EXECUTIVE SUMMARY

In 2021, 164.2M or 54% of Americans ages 6 and over participated in outdoor recreation at least once, the highest number of participants on record. As the COVID-19 pandemic continued into a second year and vaccines became available most restrictions were lifted. However, the pandemic was far from over, and health and safety issues that drove participation in 2020 continued to have a positive impact on outdoor recreation participation in 2021. **The outdoor participant base grew 6.9% since March 2020.**

KEY FINDINGS

Participation in outdoor recreation is healthy and robust. **The outdoor recreation participant base grew 2.2% in 2021 to 164.2 million participants.**

More than half (54%) of Americans ages 6+ participated in at least one outdoor activity in 2021.

The outdoor recreation participant base grew again in 2021. The outdoor participant base has increased 6.9% since the COVID pandemic began in early 2020. Although many of the official restrictions on indoor entertainment including restaurants, bars, and sporting events ended in 2021, Outdoor recreation participation continued to grow.

The number of kids participating in outdoor recreation is up, but they are participating less frequently.

New outdoor participants are more diverse than the overall outdoor participant base and are driving increasing diversity not only by ethnicity but also across age groups.

High-frequency, or “core” participation, in outdoor recreation is declining. The outdoor recreation “core” participant, who participates 51 times or more in outdoor recreation activities annually declined from 71.9% of the total outdoor recreation participant base in 2007 to 58.7% in 2021. In fact, the number of core participants declined from 99.5 million in 2007 to 96.4 million today.

The number of participants 55 years and older increased more than 14% since 2019, and senior participants ages 65 and older were in the fastest-growing age category, with 16.9% growth since the pandemic began.

Despite increases in the number of participants, total outdoor outings are declining significantly. **Outings have been in decline for the past decade** and the increased number of participants are not stemming the tide.

OUTDOOR PARTICIPATION

KEY FINDINGS

Since the COVID-19 pandemic was declared in March of 2020, the number of new and returning (lapsed) outdoor participants has increased 26%. The growth in new participants and returning participants in 2021 was the highest ever recorded.

There was a reasonable expectation that during 2021, the second year of the pandemic, outdoor participation would return to 2019 levels as indoor activity including, dining, sporting events, and fitness centers and gyms, reopened. **The 2021 data indicates that participation in outdoor recreation retained momentum in 2021. This data indicates that outdoor recreation is “sticky;” once someone begins to participate, they are likely to continue to participate.**

TERMINOLOGY

PARTICIPANT

A survey respondent who reported participating in at least one outdoor activity in calendar year 2020. Participants often reported undertaking multiple activities multiple times throughout the year.

PARTICIPATION RATE

The proportion of a group that participated in outdoor recreation or in an outdoor activity. For example, if 6 in 10 teenagers bicycled in 2020, their bicycling participation rate was 60 percent.

OUTING

A single trip during which outdoor activity was undertaken.

OUTDOOR PARTICIPATION SNAPSHOT

INTEREST LEVEL OF OUTDOOR ACTIVITIES

Growth in outdoor recreation slowed in 2021 in many categories but gains made since 2019 were not lost. Compared to 2020, 14 categories of participation grew, two were flat, and 38 categories declined. Despite slowed growth, outdoor recreation gained a net total of 3.5 million more participants in 2021. Additionally, 6.8 million Americans, a record number, tried outdoor recreation for the first time in 2021. Survey respondents, both outdoor participants and nonparticipants, were asked to choose which of 122 team, individual, and outdoor activities they intended to participate in during the next 12 months. Outdoor activities ranked highly on that list. **Activating non-participants and retaining current ones should remain a key priority for every outdoor company and organization.**

PARTICIPANT PROFILE

OUTDOOR RECREATION PARTICIPANT DEMOGRAPHICS

Despite slight increases in diversity across outdoor recreation, the current participant base is less diverse than the overall population and significantly less diverse across younger age groups.

At current level of diversity, the outdoor recreation participant base could lose more than 10% of its current number (164 million) of participants. The total U.S. population is [projected to grow from 330 million to 419 million by 2060](#). These Census projections show growth in many aspects of diversity including ethnicity and age. Notably, the projections show a decline in the number of white persons, and no ethnicity with a majority share of the total population. **Currently 72% of outdoor recreation participants are white. If the outdoor participant base does not become more diverse over the next thirty years, the percentage of outdoor recreation participants in the population could slip from 54% today to under 40% by 2060.**

RACE/ETHNICITY AND OUTDOOR RECREATION

TOTAL PARTICIPANTS, NEW PARTICIPANTS, AND THE GENERAL U.S. POPULATION

If not addressed, the lack of diverse outdoor participation could lead to:

significant revenue loss for businesses in the outdoor market

- and -

less support for the conservation of public lands.

GENDER

In the U.S., [49% of children ages 6 to 17 are female](#). In the outdoor recreation participant base, females 6 years and older make up 46.5% of all outdoor participants. The difference between the number of male and female participants has been slowly inching toward parity over the past two decades. Since 2015, females have gained about 1 percentage. **The number of females participating in outdoor recreation has increased by 20 million since 2015, and the number of males has increased by 19 million.**

PARTICIPATION BY GENDER

2015 TO 2021

MALE AND FEMALE OUTDOOR RECREATION PARTICIPANTS (MILLIONS)

2015 TO 2021

PREFERENCE FOR OUTDOOR ACTIVITIES

BY GENDER

Male and female participants don't always agree on their favorite activities. Retailers who have a better knowledge about their consumers' preferences are likely to sell them more products. Understanding how preferences differ between segments of the market, like the differences between male and female consumers is key to engaging consumers. Knowing that women really love to hike and are more likely to prefer running and biking to fishing can help us sell them the right gear for their outdoor experiences and keep them in the market longer.

ETHNICITY & RACE IN OUTDOOR RECREATION

The outdoor recreation participant base is slowly gaining ethnic diversity, but nearly three in four participants are white. In fact, despite a more diverse group of new participants, the number of white participants grew by more 2 million in 2021, while the number of Hispanic persons participating increased by 1 million.

Participation rates across ethnicity and race reveal a different view of participation showing the percentage of persons in an ethnic group who participate in outdoor recreation. African American/Black persons have the lowest overall participation rate by ethnicity at 38.6%. Asian persons and Pacific Islanders have the highest participation rate at 58%. 56.6% of white persons participate, and 51.1% of Hispanic persons participate.

DIVERSITY IN PARTICIPATION

2015 TO 2021

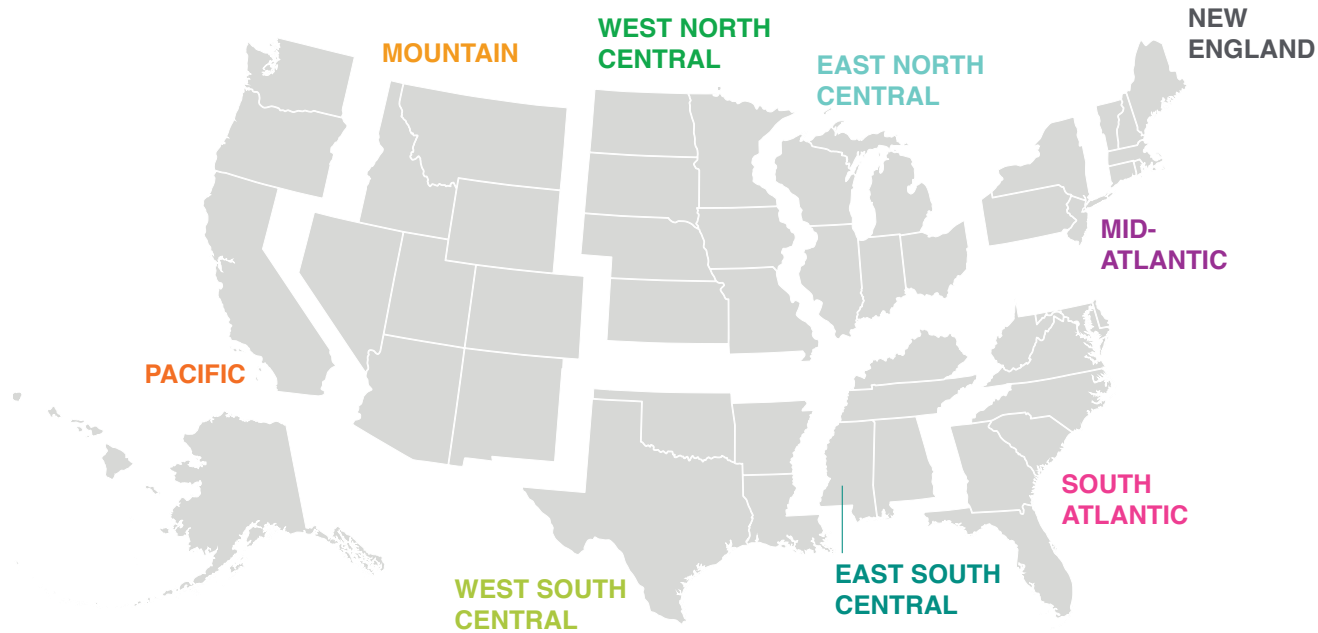

OUTDOOR RECREATION PARTICIPATION RATES BY ETHNICITY AND RACE

2015 TO 2021

GEOGRAPHIC LOCATION BY REGION

2015 TO 2021

REGIONAL PARTICIPATION

The South Atlantic region (DE., FL, GA, MD, NC, SC, VA, WV, and DC) provides the largest share of outdoor recreation participants by region with 20.1% of all participants.

The Pacific region (CA, WA, and OR) delivers 16.3% of participants, the East North Central region (IL, MI, IN, and OH) comes in third with 15.4%, and Middle Atlantic (NY, NJ, and PA) came in fourth with 12.9%.

AGE

Outdoor participation is not centered in any age group; people of all ages make up an age-diverse participant base, but there are some surprises. The number of seniors, ages 65 and older, grew by an astounding 2.5 million or 16.8% since 2019 — the largest increase by percentage and by count in the entire participant base. The next oldest age group (55 to 64) increased the second most with 2 million new participants for an increase of 11.7%. In fact, increases in participation by persons older than 55 made up 43% of the total increase in participation since 2019, the period most affected by issues related to the pandemic.

NUMBER OF OUTDOOR PARTICIPANTS BY AGE GROUP (MILLIONS) 2015 TO 2021

OUTDOOR PARTICIPANTS AVERAGE AGE

**AVERAGE AGE OF
A PARTICIPANT IN
2021:**

37.4

HOUSEHOLDS WITH CHILDREN

The participation rate for households with children has trended up for more than five years, and the pandemic accelerated that trend. More families are participating in outdoor recreation activities than ever according to our participation data. Typically, families participate at significantly higher rates than adults with no children (46% to 61%). Further, family participation is critical to future participation; most adults who participate frequently in outdoor recreation started participating when they were children.

INCOME

In 2021, according to the Bureau of Labor Statistics (BLS), the average (mean) household income in the United States was \$87,864, and the average personal income was \$63,214.

The average personal income of outdoor participants is \$70,635, about \$10,000 more than the average for all Americans. In fact, about one-third of outdoor participants earn \$100,000 or more annually, and nearly half earn \$75,000 or more.

OUTDOOR PARTICIPANTS AVERAGE INCOME 2015 TO 2021

IN 2021:**

\$70,635

EDUCATION

In the United States, highly educated persons are more likely to participate in outdoor recreation. Consider that, overall, 35% of Americans 25 years and older have earned a bachelor’s degree or higher, but more than 40% of outdoor participants in the same age group have a bachelor’s degree or higher.

OUTDOOR RECREATION PARTICIPATION BY EDUCATION LEVELS

2015 TO 2021

FREQUENCY OF PARTICIPATION

Outdoor participants spend a lot of time outdoors, and it shows. **One-third of the 164 million participants in outdoor recreation recorded 52 or more outdoor activities per year (or one outdoor activity at least once per week or more). Another one-third participated 12 to 51 times per year, or a few times per month. The final third participated in outdoor recreation between 1 and 11 times per year. The most frequent participants (51 outings or more in a year) are considered “core” participants.**

Note that percentage of “core” participants has fallen slightly over the past decade. Considering the size of the participant base, the real number of core participants continues to grow. Considering the high percentage of outdoor outings driven by core participants, losses in this category are a concern. The issues of engagement, particularly the fostering of core participants, should be included in discourse around potential participation issues for the outdoor industry.

OUTDOOR RECREATION PARTICIPATION BY EDUCATION LEVELS

2009 TO 2021

COVID-19 PANDEMIC IMPACTS

HOW HAS YOUR PARTICIPATION IN OUTDOOR ACTIVITIES CHANGED OVER THE LAST YEAR?

2018 TO 2021

OUTINGS

OUTINGS

The number of outdoor outings was up 8.4% in 2021 to 12.4 billion outings. The average number of outdoor outings per participant increased 6.1% in 2021 to 75.6 outings per participant. Note that core participants described in the section on frequency of participation represent 1 in 3 participants. Most in the core category are participating in outdoor activities several times per week.

PARTICIPATION RATES FOR YOUNGER AGE GROUPS BY GENDER

Over the past two years, participation rates are up across the board for America’s youth. Since 2019, girls ages 6 to 12 are now participating at a rate 4.9% higher, and girls 13 to 17 are now participating at rate 5.3% higher. Males ages 13 to 24 were less impacted by the pandemic; their participation rates increased less than 2%. Time will tell if these impacts continue to push girls and boys toward parity in outdoor participation in the future or if the gains made by girls will fade as participants return to pre-pandemic behavioral patterns.

PARTICIPATION RATES AGES 6 TO 24 BY GENDER AND AGE GROUP

2015 TO 2021

OUTINGS FOR HOUSEHOLDS WITH CHILDREN

The pandemic had a negative impact on the number of outdoor outings experienced by individuals in households with children, but the pandemic is not the only downward force on family participation. The number of outings per family has declined over the past five years, and in 2021, for the first time ever, adults with no children had higher participation rates than all families. The downward trend of family participation might be more of a concern for the outdoor industry if the overall number of participants and the rate of participation were not up significantly. However, this trend is still concerning and could portend a future drop in participation if children aren't introduced to outdoor activities by and with their families.

AVERAGE NUMBER OF OUTINGS FOR FAMILIES WITH CHILDREN AND ADULTS WITH NO CHILDREN

2012 TO 2021

VENUES FOR OUTINGS

Participation in outdoor recreation starts close to home. Local neighborhood parks, playgrounds, and city parks are the most popular venues for outdoor outings. The following chart indicates that more accessible, closer-to-home outdoor venues are not only more popular overall but are visited more frequently by participants. While national parks and forests are visited by fewer participants on a less-frequent basis, these public lands are seeing record visits. Participants who visit close-to-home venues frequently are more likely to visit destination venues like national parks at least once a year.

HOW OFTEN HAVE YOU VISITED THE FOLLOWING OUTDOOR VENUES IN THE PAST 12 MONTHS?

THE NEXT GENERATION

THE NEXT GENERATION: YOUTH OUTDOORS

America's children are spending more time outdoors over the past decade, and the COVID pandemic accelerated that trend. Overall, the percentage of America's kids participating in outdoor recreation was high in 2021, at just over 70%. Younger kids (ages 6 to 12) participated at higher rates than older kids (ages 13 to 17).

YOUTH OUTDOOR RECREATION PARTICIPANTS (MILLIONS)

2015 TO 2021

In 2021, OUTDOOR PARTICIPANTS INCLUDED:

20.9 MILLION
YOUNGER KIDS (6 TO 12)

14.4 MILLION
OLDER KIDS (13 TO 17)

PARTICIPATION BY YOUTH AGE CATEGORIES

Younger kids are more active in the outdoors than teens and adults regardless of ethnicity/race. Kids ages 6 to 17 years who are white have the highest participation rates of any age or ethnic group with nearly 70% participating in outdoor recreation activities. African American/Black kids participate at much lower rates possibly due to lack of access to outdoor spaces.

YOUTH PARTICIPATION IN OUTDOOR BY ETHNICITY AND AGE GROUP

YOUTH PARTICIPATION RATES BY AGE GROUPING AND GENDER

Girls ages 13 to 17 have the lowest participation rate in the youth category. Participation rates and counts of girls tend to fall off in correlation with the onset of puberty, but the rate for this group is increasing. The participation rate for teen girls went from 52.7% in 2015 to 59.4% in 2021. Young girls, ages 6 to 12 increased their participation rate from 58.9% in 2015 to 63% in 2021. Boys' participation rates rose during that time period, as well, from about 64% in 2015 to about 67% in 2021.

YOUTH OUTDOOR RECREATION PARTICIPANTS (MILLIONS)

2015 TO 2021

MOST POPULAR OUTDOOR ACTIVITIES

 RUNNING	497,092	41.2
 FISHING	170,301	13.9
 SKATEBOARDING	167,376	43.5
 CAMPING	123,831	9.2

KIDS' VIDEO GAMING AND OUTDOOR ACTIVITY

The most popular non-outdoor recreation activity for kids who participated in outdoor recreation in 2021 was video games, by a very large margin. Kids have been playing video games for decades, and while it likely has a large impact on the frequency of outdoor recreation, data indicate that video games do not have a negative correlation with casual participation in outdoor recreation.

WHAT OTHER NON-SPORT/EXTRACURRICULAR ACTIVITIES DID YOU PARTICIPATE IN THE PAST 12 MONTHS?

PARTICIPANTS, AGES 6 TO 17

CORE PARTICIPANTS

CORE PARTICIPANTS

In 2021, 58.7% of outdoor participants (96.4 million) participated in outdoor recreation with levels of frequency that qualified them as core participants. Participants who report 51 or more outings across the 53 activities that make up outdoor recreation are considered core participants. That tracks with the definition of core participants in the most accessible activities like hiking and running. Smaller categories like cross-country skiing define core as someone who participates nine or more times in the activity.

Core participants are critical to the outdoor industry because they participate most often, and they are most reliable consumers of outdoor products. Additionally, they help set the tone for norms and trends in specific categories like camping and cycling. This is where one can find the most dedicated outdoorists, including thru-hikers, live-to-shred mountain bikers, and backcountry skiers. The typical core outdoor recreation participant is about 37 years old, white, slightly more likely to be male (53%), and college educated, with annual income around \$74K. Core participants' education levels and geographic regions of residence do not vary significantly from the overall participant base.

The percentage of participants who qualify as core participants is declining. In 2011, the percentage of core participants in outdoor recreation was 70.9%, and it has been in decline since. In the past decade, the number of core participants has declined by 3.7%, while the total number of outdoor recreation participants has increased 16.3%. There are many variables that may explain this decline, including the rise of social media, broader experiences across a wide array of activities rather than a deep dive in one, and, of course, the impacts of the COVID pandemic.

TOTAL AND CORE PARTICIPANT COUNTS (MILLIONS)

2007 TO 2021

CORE PARTICIPATION

Core participants are getting older. In 2007, fewer than 16% of core participants were 55 or older; today, participants 55 or older make up 22% of the core participant base. The average age of core participants has dropped from 34 in 2007 to 37 in 2021. The decrease in the percentage and number of core participants in younger age group portends the extension of this decline in high-frequency participants well into the future. Older core participants appear to be sticking to their high-frequency participation habits longer than previous generations, which will help soften any impacts the declining base of young core participants will have. High frequency participants 55 years and older have the highest levels of income and the most time at their disposal to spend participating.

CORE PARTICIPANTS BY AGE GROUP AND AVERAGE AGE
2007 TO 2021

COUNT AND PERCENT OF CORE PARTICIPANTS (MILLIONS AND %)
2007 TO 2021

CORE PARTICIPATION BY GENDER

In 2021, the share of female core participants hit a record high of 44.6% of the participant base. The record number of females participating was set in 2013 at 44.7 million female, 1.7 million more than participated in 2021, The increasing share of females in core participation is positive for the market as women make about 70 to 80% of all consumer spending decisions [according to Forbes](#).

NUMBER OF MALE AND FEMALE CORE PARTICIPANTS (MILLIONS)

2007 TO 2021

CORE OUTDOOR PARTICIPANT GENDER SPLIT

2015 TO 2021

CORE DIVERSITY BY ETHNICITY/RACE

The core participant base is less diverse than the total participant base and diversity is shrinking rather than increasing among high frequency outdoor recreation participants. So far, increases in diversity in the broader participant base are not translating into the core category. This indicates that new participants who are more likely to be BIPOC participate less frequently. The reduction in the number of core participants and the decline in diversity as it accelerates in the overall population especially in younger age groups is an area of concern for the industry. Further, the lack of, and continuing decline of diversity among core participants should be an area of study and a target for change in the Outdoor Industry.

DIVERSITY IN CORE PARTICIPANTS

2015 TO 2021

CORE PARTICIPANTS' INCOME TRENDS

Core participants have slightly higher income levels than the broader Outdoor participant base. The average income of a core participant is about \$74K, \$K above the overall average for outdoor recreators. The downward trend in income levels of core participants turned positive in 2021, a year in which real wage growth grew 4.4% as public-facing workers across industries were in short supply and demand for their services was strong. The increase in average income among core outdoor participants is likely more a reflection of the U.S. economy rather than a dramatic reversal of a downward trend. Core participants have slightly higher income levels than the broader Outdoor participant base. The average income of a core participant is about \$74K, \$K above the overall average for outdoor recreators. The downward trend in income levels of core participants turned positive in 2021, a year in which real wage growth grew 4.4% as public-facing workers across industries were in short supply and demand for their services was strong. The increase in average income among core Outdoor participants is likely more a reflection of the U.S. economy rather than a dramatic reversal of a downward trend.

A group of people are sitting on the grass in a park-like setting, engaged in an outdoor activity. They are wearing light-colored gloves, suggesting they might be working on a project or participating in a community service. A large tree trunk is visible in the background, and the scene is brightly lit, indicating it's daytime. The text "OTHER OUTDOOR PARTICIPATION TOPICS" is overlaid on the image in a large, white, sans-serif font.

OTHER OUTDOOR PARTICIPATION TOPICS

GATEWAYS TO OUTDOOR PARTICIPATION

Campers most frequently participate in other outdoor activities, but most **outdoor participants enjoy a wide variety of both indoor and outdoor physical activities.**

GATEWAYS TO OUTDOOR PARTICIPATION

ACTIVITIES WITH HIGHEST CROSS-PARTICIPATION IN OTHER OUTDOOR ACTIVITIES

WHAT ATTRACTS PARTICIPANTS IN OUTDOOR RECREATION?

The idea of being physically active outside is enough to spur on **75% of male and 80% of female outdoor recreation participants.** Interacting with the natural environment, going to neighborhood parks, and traveling through natural environments are favorite aspects of outdoor recreation activities for participants.

GATEWAYS TO OUTDOOR PARTICIPATION

ACTIVITIES WITH HIGHEST CROSS-PARTICIPATION IN OTHER OUTDOOR ACTIVITIES

OTHER LIFE EVENTS OF OUTDOOR PARTICIPANTS

The past two years have been extraordinarily dynamic, the pandemic, political, and economic forces have driven significant changes to our way of life in the U.S. Outdoor participants indicated that they are seeking major life events less in 2021, but many expected to change jobs and buy a home in 2022 or 2023. Just 12.5% expect to start a family and 31% do not expect any (of those listed) major life event in the next 1 to 2 years. **Maybe everyone just wants to take a break from the whirlwind of change all have experienced since January 2020.**

IN THE NEXT 1-TO-2 YEARS, DO YOU SEE YOURSELF...?

AGES 18 TO 44

CONCLUSION

2021 was an excellent year for outdoor recreation participation. **Participation rates are up across demographics, but positive signs include increasing participation rates for children, for females of all ages, and for men overall.** Interest in outdoor recreation remains high even as disruptions related to the COVID pandemic came and went and came back again in 2021. **During this year, a record number (164M) Americans participated in outdoor recreation.** Outdoor recreation participation continues to be a robust recreation category with 54% of Americans participating overall and increasing.

The COVID pandemic and related societal disruptions gave outdoor recreation a boost as Americans looked for safe alternatives to indoor recreation venues including restaurants, gyms, and bars. Many recognized the relative safety of outdoor environments in the midst of a pandemic virus spread by aerosol. **In 2021, with the introduction of relatively effective vaccines, some restriction began to life, but the pandemic lasted well into 2022 and the long-term impacts on our overall health, habits, and economy will not become apparent for several years.**

METHODOLOGY

METHODOLOGY

HOW WAS THE REPORT CONDUCTED?

2021 PARTICIPATION DATA

All participation statistics are from a nationwide study conducted during the 2021 calendar year by Sports Marketing Surveys USA (SMS). Under the guidance of the Sports and Fitness Industry Association (SFIA) and seven other sports industry associations that make up the Physical Activity Council (PAC), the participation study was designed and launched by Digital Research (DRI). All other data is attributable to the SFIA/SMS research partnership.

SAMPLE SPECIFICATION

During 2021, a total of 18,000 online interviews were carried out with a nationwide sample of individuals from U.S. proprietary online panels representative of the U.S. population for people ages six and older. Strict quotas associated with gender, age, income, region, and ethnicity were followed to ensure a balanced sample.

The 2021 participation survey sample size of 18,000 completed interviews provides a high degree of statistical accuracy. All surveys are subject to some level of standard error—that is, the degree to which the results might differ from those obtained by a complete census of every person in the U.S. A sport with a participation rate of five percent has a confidence interval of plus or minus 0.32 percentage points at the 95 percent confidence level.

A weighting technique was used to balance the data to reflect the total U.S. population ages six and above. The following variables were used: gender, age, income, ethnicity, household size, region, and population density. The total population figure used was 304,745,039 people aged 6 and older.

Activity reporting is based on a rolling 12-month participation rate. All charts represent data from U.S. populations ages 6 and over, unless otherwise specified. If you have specific questions regarding the methodology, please contact Sports Marketing Surveys at info@sportsmarketingsurveysusa.com.

YOUTH INTERVIEWS

All interviews of children under 13 were carried out following the guidelines set out in the Children's Online Privacy Protection Act of 1998 (COPPA). No children were contacted directly. The panel is a balanced sample of households with children in each age group, but contact is always made through designated adult panelists. The adult panelist receives the survey invitation on behalf of a specified child, age six to 12, and they are asked to complete the survey together. Respondents ages 13 to 17 are contacted in a manner similar to respondents ages 6 to 12, but they are asked to complete the survey themselves.

ABOUT THE PHYSICAL ACTIVITY COUNCIL (PAC)

The survey that forms the basis of the 2022 Special Report on Hunting & The Shooting Sports is produced by the Physical Activity Council (PAC), which is a partnership of leading organizations in the U.S. sports, fitness and leisure industries. While the overall aim of the survey is to establish levels of activity and identify key trends in sports, fitness and recreation participation, each partner produces detailed reports on specific areas of interest. Partners include Outdoor Foundation (OF); National Golf Foundation (NGF); Snowsports Industries America (SIA); Tennis Industry Association (TIA); USA Football; United States Tennis Association (USTA), International Health and Racquet and Sportsclub Association (IHRSA); and Sport and Fitness Industry Association (SFIA).

NOTES

Unless otherwise noted, the data in this report was collected during the 2021 participation survey, which focused on American participation in the 2021 calendar year. Please note that some information includes data that was collected during previous surveys, as some questions are not asked every year.
